Forecast for Saturday 21 Nov 2020

Weather: Rain and drizzle, briefly heavy and increasingly wintry above 800m, will clear southeast by dawn. Then a cold day with bracing westerly gales and frequent showers spreading in off the Atlantic and little shelter afforded to any area. Showers falling as sleet and snow above around 700m leading to a thin covering of snow on highest ground by the end of the day.

Chance of cloud free mountain/hill tops above 800m: 60% with some reasonable breaks between showers and the main cloud base above summits, but showers often bringing cloud down to 500-700m.

Visibility: Very good outside of showers, but often reduced to a few kilometres on lower slopes in rain and a few hundred metres in snow above around 700m.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
High level of wind chill and unabating gales. Conditions likely rapidly changing as heavy showers pass through with neighbouring slopes often lost to view.

Forecast for Sunday 22 Nov 2020
Weather: A similar day to Saturday with frequent showers continuing to spread from the west, but wind strengths will be a little lighter, albeit still to gale force strength. Showers will remain of sleet and snow above around 700m.

Maximum wind: Westerly 25-30mph gusting up to 45mph through morning, easing to 20 gusting 35mph by evening.

Chance of cloud free mountain/hill tops above 800m: 60% falling 40% with low cloud across the hills generally confined to showers, but cloud descending as low as 400m for short periods and more widely through evening.

Visibility: Very limited during passing showers, with visibility down to a hundred meters or less in snow showers and several kilometres on lower slopes.

Temperature: **Glens:** 5-7C.
At 800m: Minus 1 C.
Freezing level: 800m.
